

The IB-105 (interface box), available in five options, is a junction that provides connectivity between the MS-710 scanner, the host or LAN, power input, and trigger devices.

The box has an internal relay contact (1 watt), a new master switch to allow input of master label data, a default pin button, a power switch, and a mode switch to toggle between RS-232 and RS-422 or 485 (depending on option).

Part Number: 99-420001
